Please register for your chosen sessions at www.codestone.net/contact/accel.php

1. Cloud Business One - Accelerate the value of SAP Business One by migrating to the cloud

Delivering SAP Business One in the Codestone Cloud reduces implementation costs and adds resilience. This session will describe the business case for migrating to Codestone's cloud, the process involved, and importantly the significant benefits that will be achieved.

2. Mobilise SAP Business One - Coresuite Mobile for iPad, iPhone and more

Coresuite mobile allows you to take advantage of all the known benefits and functions of SAP Business One, anywhere and at any time, allowing businesses to make informed business decisions from any location. Come and see this in action on devices such as smartphones, iPads and tablet PCs.

3. Automate & Integrate - TaskCentre for SAP Business One featuring new XML web services tools

TaskCentre for SAP Business One is market leading Business Process Management software. Enhance, extend and automate the processes within SAP Business One with this ground breaking technology. During this round table session we will provide a number of demonstrations using real world examples that show how any organisation may quickly obtain tangible savings in both time and costs through TaskCentre for SAP Business One.

4. SAP Business One Roadmap - The future of SAP Business One

Hosted by Joel Harris who has six years experience at SAP working specifically with SAP Business One as a senior member of the SAP Business One Solution Expert team. In this role his responsibilities include managing the introduction of new product releases to the market. This session will communicate SAP's future vision for SAP Business One and describe new features and functionality planned for future releases.

5. SAP Business One 8.82 - Demonstration of the latest version of SAP Business One

See a preview of the latest version of SAP Business One 8.82. During this session you will experience enhancements including; campaign management, Crystal Reports (across multiple databases), scheduling of service calls, pick and pack, blanket agreements (call off orders) and MRP.

6. Supercharge your SAP Business One System - Boyum B1 Usability Package

This add-on for SAP Business One improves the usability of the product and adds functionality without the need for costly bespoke development. This session will be used to demonstrate a number of examples that are relevant to the majority of businesses.

7. Platypus - Rapid Application Development in the Cloud

Get a sneak preview of Platypus. Codestone can build and deploy rich and robust cloud applications in short time-frames and at a very competitive cost. See this in action as we build applications in front of your eyes.

8. Journey to the Cloud - From Legacy to Liberty

Codestone has been at the forefront of the virtualisation and cloud revolutions, passing on the significant benefits of introducing these technologies to our customers. This session examines the evolution of IT from a commercial perspective and offers organisations an insight into how they can adopt these best practices for commercial gain and business continuity.

9. Codestone Cloud - Flexible, self service Infrastructure as a Service (IaaS)

Infrastructure as a Service allows you to rent compute power and software licences, hosted on a multi-tenanted platform in a secure, purpose built, highly available data centre on a month by month basis. In this session we demonstrate the power and flexibility of the Codestone Cloud service.

10. Cloud Backup and Disaster Recovery - Robust, automated workload and data backup

Backup business critical data with Codestone's cloud backup and workload replication services. With state of the art management software and a robust infrastructure, we provide you with an enterprise class online backup service which ensures that you can continue business operations after any kind of data disaster.

11. Which Virtual Desktop Infrastructure (VDI)? - VDI-In-a-Box or shared desktops

Desktop virtualisation allows IT departments to centrally manage and distribute desktops, enabling anywhere access and providing benefits in time and cost reduction for any size of company. As the VDI market matures there are a number of options available for organisations to achieve desktop virtualisation. This session discusses the benefits of VDI and describes the paths to reach the right solution for you.

12. Any Time, Any Place, Any Device

See how solutions from Codestone and Citrix can ensure your business is prepared for the huge shift towards mobile working and the consumerisation of IT. We will show you how to deliver your desktops and applications to all types of mobile device.
