INSPIRE TRANSFORM ACHIEVE

Five ways SAP Business One warehouse management will improve your logistic process

OVERSPENDING AND WASTAGE

INACCURATE INVENTORY

COMMON CHALLENGES IN WAREHOUSE MANAGEMENT

NO REMOTE VISIBILITY

LACK OF REPORTING

LIMITED STOCK CONTROL

How can SAP Business One warehouse management help?

BETTER INVENTORY MANAGEMENT

- Access accurate, real-time stock levels
- Identify slow-moving stock for promotion
- Pinpoint and repurchase fast-moving stock
- Maximise and optimise storage space

SCANNING FOR DIRECT DATA CONTROL

Our Codescan barcode scanning system enables you to scan straight into SAP Business One for **seamless data management of your stock.**

ACCURATE STOCK LEVEL FORECASTING

- Use stock control tools to cut waste and overspending
- Predict product supply and demand through Material Requirement Planning (MRP) functionality
- Monitor stock levels over time to refine production plans

WAREHOUSE MANAGEMENT FROM ANYWHERE

Through cloud-based connectivity, SAP Business One warehouse management enables multiple users remote access to the system from **anywhere, anytime.**

RESPONSIVE REPORTING

SAP Business One warehouse management generates full-scale reports with ease, including data insights that allow you to make **quick and effective management decisions.**
