

— A CODESTONE CUSTOMER STORY —

# Transport Systems Catapult (TSC) takes finance automation to the next level with SAP Business ByDesign

# ABOUT TSC CATAPULT

Founded in 2013 as part of the wider Catapult programme – a government-supported network of elite technology and innovation centres, each with their own specific sector focus – TSC focuses on transforming the UK's capability for innovation within the transport sector and to help drive future economic growth.

# THE --- CHALLENGE

TSC had been using Sage at a basic level but as the organisation grew it needed a solution that would support and scale up as its business needs expanded.

Part of a network of companies, some of which had already implemented SAP solutions, TSC wanted to improve the way it handled its financial data, transactions and timesheets to ensure everything could automatically update and flow seamlessly.

***“It was key that all our financial data would flow efficiently to allow us to report and make better, more informed decisions.”***

*Fiona Green, Financial Controller, TSC*

# THE SOLUTION

Codestone implemented SAP Business ByDesign for its capability of delivering a single integrated cloud-based ERP solution that would enable the company to manage all of its core financial activities.

The managed cloud solution unites TSC's business functions and optimises its financial processes including the ability to handle all financial transactions, VAT returns, bank activities and overall financial management and reporting. With SAP Business ByDesign TSC is also able to adopt a systematic approach to efficient project and time sheet management.

***“Codestone took time to understand our needs and scope out a project plan for us. It was a success and as a result we’ve already set up four other companies.”*** *Fiona Green, Financial Controller, TSC*

# STAND OUT BENEFITS SAP BUSINESS BYDESIGN

TSC has optimised its end-to-end business processes, so every task is now systemic and carried out in an agreed way

Automated controls ensure that TS Catapult can manage its approvals and core accounting processes seamlessly

TS Catapult's 140 UK-based users can work securely from anywhere

SAP Business ByDesign will enable TSC to scale up as the company grows

The background of the image is a high-angle, wide shot of a multi-lane highway in a city. The highway is filled with various vehicles, including large trucks and cars. In the background, several tall apartment or office buildings are visible against a hazy sky. A semi-transparent green filter is applied over the entire image. Overlaid on this green filter is a complex network of thin, light-green lines that connect various points across the scene, suggesting a data or communication network. The quote text is centered in the middle of the image in a white, italicized serif font. It is flanked by two large white double-quote symbols. Below the quote, the name and title of the person providing the quote are written in a smaller, white, sans-serif font.

“

*The Codestone team were very knowledgeable and helpful and have enabled us to move forward successfully.*

”

Fiona Green, Financial Controller, TSC
